Sequence 3, Application US/10239176

Publication No. US20040086856A1

GENERAL INFORMATION:
APPLICANT: TAKAHASHI, MASAYOSHI

APPLICANT: OKADA, JUN

APPLICANT: OKADA, JUN

TITLE OF INVENTION: NUCLEIC ACID PROBE-IMMOBILIZED SUBSTRATE AND METHOD OF

TITLE OF INVENTION: DETECTING THE PRESENCE OF TARGET NUCLEIC ACID BY USING THE SAME

FILE REPERENCE: 228763USOSRDPCT

CURRENT FILING DATE: 2003-03-19

PRIOR APPLICATION NUMBER: DCT/JP02/08670

PRIOR APLLICATION NUMBER: DF 2002-01-8

PRIOR FILING DATE: 2002-07-26

NUMBER OF SEQ ID NOS: 18

SEQ ID NO 3

LENGTH: 39

GENERAL INFORMATION:

APPLICANT: Scheter.

APPLICANT: Scheter.

APPLICANT: Petersen, Deanna M.

TITLE OF INVENTION: IMMUNOSTIMULATORY NUCLEIC ACIDS FOR THE

TITLE OF INVENTION: TREATMENT OF ANEMIA, THROMBOCYTOPENIA, AND NEUTROPENIA

FILE REFERENCE: C1041/7014 (AMS)

CURRENT APPLICATION NUMBER: US/09/895,007A

CURRENT APPLICATION NUMBER: US 60/214,368

PRIOR APPLICATION NUMBER: US 60/214,368
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ö

GENERAL INFORMATION:
APPLICANT: Bentwich, Isaac
PAPLICANT: Shiler, Kvuzat
TITLE OF INVENTION: Bioinformatically detectable group of novel regulatory genes and TITLE OF INVENTION: uses thereof
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ö
